

# NEW! WorkFit-SR clamps to the rear of your workspace

The WorkFit-SR offers the same great stability and ergonomic features as our popular WorkFit-S, but clamps to the rear of your workspace instead of onto the front. It features:

- Premium furniture solution with refined aesthetics and superior material construction: All-aluminum worksurface, bow and pivots are extremely sturdy, allowing for handle-free height adjustment
- Two worksurface depths to choose from: "Standard surface" depth provides generous focal distance between you and the screen for optimized ergonomic comfort; "Short surface" models can fit tighter work areas as shallow as 24" (60 cm)
- Accommodates taller users: worksurface can lift higher than other WorkFit models and the monitor pivots can be installed at taller heights
- Internal cable management hides cord clutter

Grommet Mount for WorkFit-SR: 98-038

Rear-mount design prevents the keyboard tray from intruding into your workspace

Monitor(s) and keyboard tray/surface move in tandem; monitor(s) lift and tilt independently
